HUNTER DOUGLAS LITERISE® TRIMKIT

MANUFACTURER'S CERTIFICATION STATEMENT Issued January 1, 2011

Hunter Douglas certifies that the LiteRise® TrimKit, when used on certain Duette® and Applause® honeycomb shades, and used in conjunction with low emissivity “low-e” double-pane glass windows is an “Eligible Building Envelope Component” classified as an “insulation material or system” as such terms are defined in Section 4.01 of IRS Notice 2009-53 and, subject to the restrictions set forth below, qualifies for the Federal Tax Credit for Non-business Energy Property allowed under Internal Revenue Code Section 25C, as modified by Section 1121 of the American Recovery and Reinvestment Tax Act of 2009, and as further modified by Section 710 of the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010.

The qualifying TrimKit must be mounted over low emissivity “low-e” double-pane glass windows to be eligible for the tax credit. The TrimKit must be installed and used in accordance with the manufacturer's instructions for installation and use of this product.

The tax credit applies to the amount paid for the TrimKit surcharge only. (Reference Guide surcharge is \$199 per shade. Actual pricing may vary.)

Finally, the TrimKit does not qualify when used with shades with sheer or semi-sheer fabrics and, for some fabrics, shades with the Top-Down/Bottom-Up hardware option.

The qualifying TrimKit referenced, identified, and installed as described herein, meets the prescriptive criteria established by the 2009 International Energy Conservation Code (IECC).

Under penalties of perjury, I declare that I have examined this certification statement and, to the best of my knowledge and belief, the facts are true, correct and complete.
