

## Woven Textures<sup>®</sup> Roman Shades

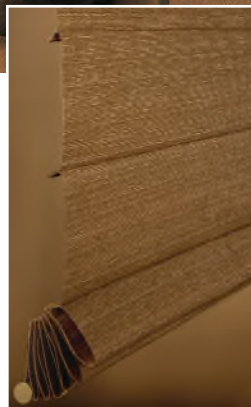

Alustra<sup>®</sup> Woven Textures<sup>®</sup> introduces a new batten back construction for all Roman shades that will improve performance and enhance appearance. This construction technique has inverted tunnels that create a soft, tailored look when lowered and defined folds when raised.

### Key features of Alustra Woven Textures Roman Shades with batten back construction:

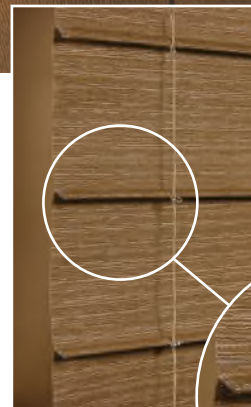

- New batten back construction increases functionality and reliability to ensure smooth operation every time.
- Tunnels are tacked on the side to prevent battens from coming out.
- To enhance child and pet safety, our innovative cording system is on the back window-facing side of the shade to reduce access to rear cords.
- Available in all fabrics (Origins, Haven, Harmony, Origami, Fusion, Maché), the Alustra Woven Textures collection offers 26 distinctive options. These exclusive fabrics are an innovative, light-filtering alternative to solar screens.
- Choose from a range of headrail options to build a shade perfectly suited to your customers' needs:
  - The Traditional wooden Cordlock headrail offers a more classic-looking Roman shade installation and comes standard with a 6" valance; returns are available for outside mounts.
  - The Standard metal headrail is available with or without a 6" valance in either the Cordlock or SoftGlide<sup>®</sup> cord loop system. Add a light-filtering or room-darkening liner on the Standard Cordlock system for additional privacy and light control.
  - The SoftGlide cord loop with a cassette is perfect for more streamlined applications.
- Hunter Douglas Lifetime Guarantee.

## MEASURING INSTRUCTIONS

Round all measurements down to the nearest 1/8".

### Inside (IB) Mount

- Measure the width inside the window opening at the top, middle and bottom; order the narrowest measurement.
- Measure the height inside the window opening at the left, center and right; order the shortest measurement.
- Measure the diagonals. If the two diagonal dimensions are not exactly the same, it may be necessary to specify an outside mount for optimal light control and privacy.

### Outside (OB) Mount

- Measure the desired width, allowing at least 2" overlap on each side to minimize light gaps.
- Measure the desired height, allowing at least 2" top and bottom overlap if possible.

## OPTIONAL FEATURES

- Sewn-in hem bar
