

The Perfect Day.

Engineered Perfectly.

America's Retractable Awning Pioneer

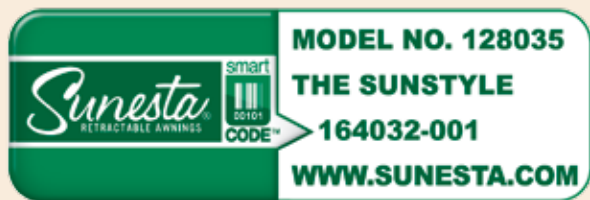

As the pioneer in manufacturing customized retractable awnings, Sunesta offers unmatched engineering for perfect performance. Since 1981, we have led the industry in technological advances, and continue this tradition of engineering excellence in all our products. Every component, feature and option is designed with this focus on innovation.

Sunesta's in-house experts partner with other component specialists and engineers around the world to ensure our awning systems offer best-in-class technology. We invented the process of computer-aided awning manufacturing, and our proprietary equipment and processes ensure precise customization with the industry's fastest turnaround time.

For you, this means your awning is perfectly crafted by our team of experts with attention to every last detail.

Look for the Sunesta Lifetime Service Label

Only Sunesta Retractable Awnings are branded with a unique order number. We call it the SmartCode™ – your awning's individual I.D. number.

Through the SmartCode system, we keep your custom order details and specifications in our database, allowing us to answer product questions and provide updates regarding your individual awning. We have a SmartCode on file for each awning produced, for instant, customized service.

The Perfect Day. Engineered Perfectly.

Your home is more than a house – it's your personal oasis. Sunesta Retractable Awnings allow you to expand and enhance your home's outdoor living area by providing shade when you need it and sun when you want it. Either way, you create your perfect day.

Our awnings are designed and built for consistent, trouble-free, smooth performance for years to come. Sunesta is unmatched in the performance, reliability and durability of our custom made awnings.

The Perfect Day. Engineered Perfectly.™

With All Due Respect to Mother Nature, We've Engineered the Perfect Day.

Our awnings add to your quality of life in many ways. The advantages of a Sunesta Retractable Awning go beyond custom-made shade – we offer multiple benefits to enhance the enjoyment of your home.

Shade when you need it, sun when you want it

With a Sunesta Retractable Awning, you control the shade. Enjoy your outdoor living area more than ever with the convenience of total shade control. Extend and retract your Sunesta Awning with the turn of a handle or push of a button – it's that simple. Your awning can be extended fully, partially, or retracted depending on the amount of shade you need or how much sun you want.

Block the sun, keep your view

Our strong, streamlined designs eliminate the need for support poles, so our awnings block only the sun or light rain, and not your view. Maximize your usable shaded outdoor living space and your view with the addition of a Sunesta Retractable Awning to your home.

Beautify your home

Your home is one-of-a-kind and your awning should be too. That's why we offer total customization so that each Sunesta is made to the distinct needs and style of each homeowner. And Sunesta Retractable Awnings don't just add beauty and space to your home, they also add equity – your covered outdoor space increases living area and value.

Expand your space

Without protection, you can't fully enjoy your outdoor living area. A Sunesta Retractable Awning allows you to expand your home's livable area, effectively adding a customized outdoor room.

Control room brightness

Unlike permanent patio awnings, roofs, and enclosures, Sunesta Awnings can be retracted during darker times of the day, or on cloudy days, to brighten the interior of your home naturally.

Protect your indoor furnishings

The sun's UV rays can severely damage and fade furniture, carpet, upholstery, drapes and flooring. You can protect your valuable interior furnishings and prolong their life with a retractable awning from Sunesta.

Save on your utility costs

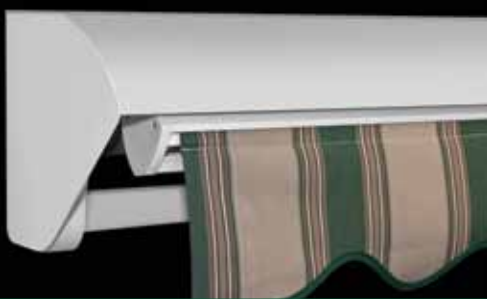

Our awnings help lower energy costs year-round. On warm days, extend your awning to block the sun from entering your home. Shading your interior will naturally cool your home and reduce air conditioning costs up to 25 percent. On cold days, you can retract your awning, allowing the sun to help heat your home.

In snowy and stormy climates, your Sunesta Awning can be retracted, eliminating the need for expensive awning removal and reinstallation which are necessary for permanent-frame awnings.

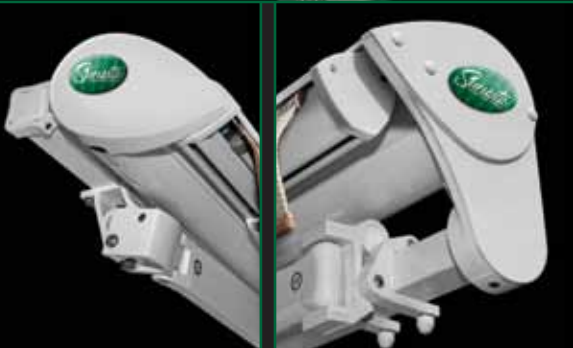

Perfectly Engineered Solutions to Fit Your Unique Home

Options and Features Designed for Precision Fit and Performance

Our durable, one-piece SmartHood™ can be added to any model to provide additional protection, particularly in snowy and icy climates.

The unique design of our optional SmartCase™ offers 360 degrees of total fabric protection for your retracted awning, and removes leaves and other debris with each retraction.

More than just a drop-down valance, our SmartDrop™ feature extends from the front bar of your awning when you want extra protection from east or west low sun without sacrificing your view or head room. Our hi-tech SmartDrop™ fabric is manufactured with an open weave to block the sun while providing exceptional see-through visibility, and is available in a wide range of colors. This feature can be motorized.

For narrow widths and large projections, our SmartFold™ Arms automatically fold over each other when retracted for a cleaner look and efficient operation.

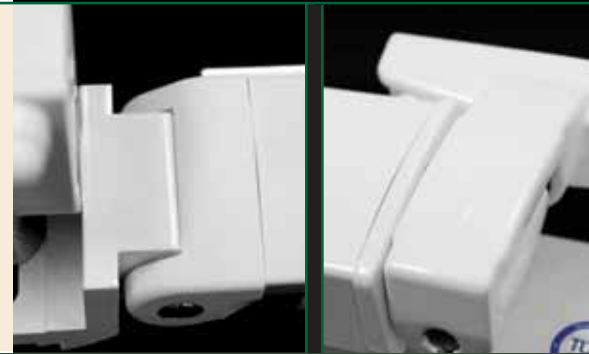

Motorized or manual operation – it's your choice. Our popular SmartPower™ motorized option allows extension and retraction with the simple push of a button (wall-mounted or remote) and is backed by our full 5 year warranty. Or, select our standard beveled gears option for fast and easy manual operation with minimal effort.

Should you decide to motorize your awning, you'll be interested to know that Sunesta offers a range of remote control options featuring one, four and five channels in either weatherproof or wall mounted versions. In addition, Sunesta offers motion and sun sensors for efficient operation of your retractable awning.

Your awning should enhance your home's appearance. With our SmartPark™ technology, the frame alignment is engineered perfectly for the most streamlined, attractive appearance of your awning even when fully retracted.

Our proprietary SmartPitch™ feature allows the angle of your awning to be custom-set at installation for the perfect look and overhead clearance you want.

The angle of the sun changes with the time of day and season. Our SmartTilt™ technology allows you to quickly and easily adjust the angle of your awning to ensure shade where you want it, regardless of the sun's position.

Mounting Options

Roof Mount

Wall Mount

Soffit Mount

The Perfect Look for Custom-Made Shade

Your Sunesta Awning will enhance your home's outdoor living area, beautifully. With the industry's broadest range of designer fabrics to select from, your customized awning will perfectly match your home's exterior and architecture.

Our computer-guided fabric measuring, cutting, seaming, and finishing are done with unmatched craftsmanship. Our SmartFab™ joining of seams, hems, and pockets are guaranteed for the life of the fabric. Your selected fabric pattern will be custom matched to your choice of valance style for a perfect finished appearance, and all fabric seams are ultrasonically sealed and then sewn with Sunesta's virtually-invisible SmartThread™ that is guaranteed for the life of the awning.

Choose from more than 190 premium designer fabrics in solids and patterns, with colors to match any home. All of our acrylic designer fabrics are solution-dyed for outstanding durability and fade resistance and are also backed by our 10 year factory warranty.

Reliable Frame Performance for Years to Come

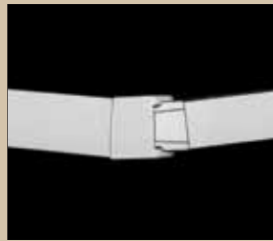

Strength by Design

Up to four aircraft-quality steel cables

Three springs maximize arm strength

Angled arm optimizes fabric tension

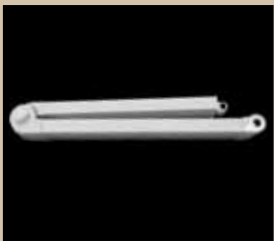

Oval front connection for flexibility

Precise and dependable arm shoulders

Superior Construction

Hydraulically pressed and epoxied arm assembly

Forged aluminum arm components

Stainless steel and coated extruded two-bolt brackets

TUV Certification - The only recognized independent testing agency in the world with rigid standards for certifying retractable awnings

A Beautiful Finish

Three electrostatic armor-coated frame finishes

Cables hidden while arm extended

Concealed hardware, bracketing, and components

Sleek and compact frame appearance

Service and support from a reputable leader

NOTE: Components vary by model.

We Have You Covered

“We’re thrilled. We weren’t sure what style of awning we needed, but after talking to the Sunesta dealer we ended up with just the right awning for our patio – now we spend almost every day outside. We love our new awning. Thanks!”

— Mrs. Daniel Murphy, Florida

The most reliable, knowledgeable dealer network in the industry

When you work with a local Sunesta dealer, you know you’re working with an expert. Sunesta dealers are selected for their professionalism and commitment, and are trained intensively at our manufacturing facility. Our dealers know our awnings inside and out, thanks to our in-depth, ongoing training and partnership approach with each.

As a first-time awning purchaser, you need a dealer who understands the difference the right awning will make for your home, offering in-home professional design guidance. Our dealers are true consultants for you, providing the advice you need to get the best, most attractive awning for your needs.

Sunesta dealers have you covered. Not only do our dealers understand how to get the look you want, they also provide in-field engineering support, service and installation. Our dealers see each installation to ensure quality from start to finish. And all of Sunesta’s dealers offer ongoing service and maintenance, providing peace of mind that your awning will function perfectly and look beautiful for years to come.
