

HUNTER DOUGLAS AERC RATED AND CERTIFIED PRODUCTS

Analysis conducted by the U.S. Department of Energy (DOE) has shown that window attachments can save a significant amount of energy in residential and commercial buildings. In 2014, the Attachments Energy Rating Council (AERC) formed to provide information about the energy performance of window attachments. Hunter Douglas is the first manufacturer to earn a national energy performance rating and certification for interior window covering products through AERC.

These ratings are based on several factors such as U-factor and Solar Heat Gain Coefficient (SHGC). The AERC Energy Improvement rating is not a whole-home energy saving number; rather, it represents the amount of energy that would otherwise be lost through the window without using a window attachment.

How to read the AERC Label:

There are two types of AERC ratings for each window attachment product category: a Cool Climate rating and a Warm Climate rating, each on a scale from 0 to a Max Improvement rating which are based on typical, manual operation. Locate your climate zone on the map, then review Cool and/or Warm Climate ratings on the label.

AERC Label for Hunter Douglas products:

Locate the appropriate Hunter Douglas product in the charts below. In the far right column, AERC LABEL, click on the AERC label number to open pdf and review your ratings for this product.

Climate Zones

COOL
Use Cool Climate Rating

WARM
Use Warm Climate Rating

MIXED
Use Both Climate Ratings

Sample AERC Label

Climate Rating Explained

Cool Climate Rating
The closer the Cool Climate rating is to the Max Improvement rating, the less energy is required to **heat** the home.

Warm Climate Rating
The closer the Warm Climate rating is to the Max Improvement rating, the less energy is required to **cool** the home.

NOTE: Use both Cool Climate and Warm Climate ratings for the gray Mixed Climate rating area noted on the map.

Duette® Architella® 3/4" and 1 1/4" Room-Darkening Honeycomb Shades

Product Name	Cool Climate Rating (Max 15)	Warm Climate Rating (Max 50)	U-factor	Solar Heat Gain Coefficient	AERC NUMBER	AERC LABEL
Duette Architella Alexa™ 3/4", C94	10	47	0.23	0.17	CS-L-T2S04	AERC-Cellular-C94.pdf
Duette Architella Batiste Bamboo™ 3/4", C96	10	47	0.23	0.17	CS-L-2ZUE2A	AERC-Cellular-C96.pdf
